DUAL-SHEAR® TWO-SHAFT SHREDDERS

SSI’s Dual-Shear® line of low-speed, high-torque, two-shaft, rotary shear shredders are designed to efficiently process the most difficult materials.

Dual-Shear® shredders from SSI are designed to process a wide range of materials from metals, soft plastics and tires to product destruction or any diverse and contaminated material where particle size variation is acceptable. Output consists of “strips” the width of the cutters - usually 1” to 3”. Dual-Shear® shredders are configured in a variety of sizes, drive options, and cutter configurations.

THE DUAL-SHEAR® ADVANTAGE

▪ High-torque shearing technology efficiently processes tough materials
▪ Wear-resistant cutters
▪ Shock protection
▪ Bulk feed capability
▪ Energy efficient operation
▪ Low noise, dust, heat generation and maintenance costs
▪ Heavy-duty construction
▪ Minimum foundation requirements
▪ Minimal “fines” generation

DESIGN FEATURES

▪ Electric, hydraulic and SmartDrive™ drive configurations
▪ Direct drive
▪ Patented “Severe Shock Protection” (SSP)
▪ Cleaning Fingers
▪ Application-specific feed hoppers and cutter configurations
▪ Seal & bearing protection
▪ Patented “Advanced Cutter Locking System” (ACLS)

TYPICAL SHREDDING APPLICATIONS

ALTERNATIVE FUEL/REFUSE-DERIVED FUEL
MSW, industrial waste, wood, paper, tires, plastics, carpet, textiles, etc.

PRODUCT/SECURITY DESTRUCTION
Paper/documents, hard drives, off-spec or outdated goods, pharmaceuticals, electronics, plastic parts, etc.

WASTE TREATMENT/ALTERNATIVE DISPOSAL
Medical waste, radioactive materials, organics, paper fibers, MSW, industrial waste, etc.

CONTAMINATED MATERIALS & SEVERE APPLICATIONS
Materials with diverse contamination and hazards.

METAL MATERIALS
Aluminum, ferrous, non-ferrous, metal turnings, steel drums.

TIRES
Passenger, truck, and OTR (off-the-road) tires.

PLASTICS
Purgings, rolls and sheets, film, off-spec products, etc.
