

CONSTRUCTION & DEMOLITION DEBRIS SHREDDING

SSI understands the contractor's need for versatile, reliable and robust shredding equipment that's capable of taking on a variety of materials.

In 1980, SSI Shredding Systems began as a contract shredding service provider with a single mobile shredding machine. After more than 30 years, SSI now offers a complete line of size reduction solutions specially suited for the C&D materials recycling market. Ease of maintenance, on-line reliability and performance are all optimized into SSI's machinery to efficiently shred, tear, and break bulky debris into manageable pieces that are easy to transport and economical to dispose of.

INDUSTRIAL: EXTERIOR SOLUTIONS

Image 'A': Volume Reduction and Ferrous recovery with remote control track mounted equipment.

INDUSTRIAL: INTERIOR SOLUTIONS

Image 'B': Skid mounted electric drive shredders for basement placement. Reduction of interior furniture, flooring and wall materials.

MUNICIPAL: BULKY WASTE REDUCTION / CONTRACT SHREDDING SERVICES
